RE-ELECT MIKE DONOVAN CORONADO CITY COUNCIL 2020

In 2016, I campaigned on the issues of building density/historic preservation; traffic; tourism; Airport Land Use Compatibility Plan (ALUCP); and Navy relations. Going forward in 2020, my objectives as a Councilmember remain consistent, with the addition that:

- **Leading Coronado out of the COVID-19 crisis is now paramount** to maintain the health and safety of our citizens; to support local businesses in ensuring an expedient revitalization of Coronado's commercial districts; to balance the city's reduced revenues while maintaining the present caliber of public services; and to keep residents informed of the totality of Coronado's recovery process.

In addition, I will continue to focus on **improving residential quality of life**, especially with regard to:

- **Advocating for a reduction in SANDAG's "Regional Housing Needs Allocation" (RHNA)** from the current mandated allocation of more than 900 new housing units to be built in Coronado over the next 8 years, and establishing criteria to implement the final mandated allocation in a way that will mitigate mass and preserve Coronado's vintage scale, open areas, and charm.
- **Collaborating on the Port of San Diego's master plan** to secure the most residential-favorable outcomes for any Port changes to the Ferry Landing, Coronado Golf Course, and Grand Caribe Isle in Coronado Cays.
- **Calming traffic** by developing a comprehensive Traffic Calming Plan for Coronado and creating alignment between it and active transportation objectives to reduce vehicular traffic speeds; increase pedestrian/bike safety; and improve aesthetics, especially as they relate to enhanced greenery.
- **Executing relinquishment of State Routes 282 and 75 (3rd and 4th Streets, Orange Avenue, and Strand)** from California Department of Transportation (CALTRANS) by working through the legislative approval process and developing a plan for operation and maintenance of roads.
- **Finalizing Airport Land Use Compatibility Plan (ALUCP) for NASNI** by continuing to advocate with San Diego County Regional Airport Authority to minimize negative impacts on land use in Coronado.
- **Maintaining Navy relations** by collaborating in reducing detrimental effects of base operations on residential neighborhoods with regard to aircraft safety and noise, as well as vehicular traffic; and lobbying federally-elected officials for additional security funding so that all base entry gates can be kept open to minimize traffic backups in Coronado.
- **Improving environmental protection** by completing a Climate Action Plan for reducing greenhouse gas emissions; developing a Sea Level Rise Vulnerability Assessment and Adaptation Plan; and establishing a strategy for allocating federal funding to address the problem of Tijuana River Cross-Border sewage, including a management plan and timeline for improvements, as well as identifying necessary next steps.
